

MUHAMMAD HAZIQ HAIQAL BIN KAMARUDDIN

Shah Alam, Selangor, MY
Mobile: +60 17-749 2150 • Email: haziqhaiqal1961@gmail.com

Highly skilled IT professional with a broad technical proficiency spanning multiple technology stacks and IT domains. Specializing in software development with proficiency in React, while acquiring skills in full-stack development, cloud computing, and database management. Proven track record in front-end and mobile app technologies. A strategic thinker and problem solver, continuously learning, seeking to enhance skills and remaining with the latest technology trends and best practices.

AREAS OF EXPERTISE

- | | | |
|----------------------|--------------------------|------------------------|
| ✓ Mobile Development | ✓ Full Stack Development | ✓ React for Dynamic UI |
| ✓ Git & GitHub | ✓ Jira | ✓ Project Management |

CAREER HIGHLIGHTS

Achievement: Chosen as the recipient of the GT plaque for the Real-Time Payment Platform (RPP) project, reflecting the successful implementation and impactful outcomes achieved.

Software Development: Contributed in new products development and enhancement of MAE mobile app core module (payment and transfer), ensuring its timely completion and successful deployment to production.

Team Leadership: Mentored junior developers understanding codebase structure, providing support and enhancing team efficiency by implementing best practices. Resulting in increased productivity and faster onboarding.

PROFESSIONAL EXPERIENCE

Maybank Berhad, MY — Software Developer, Group Technology (May 2022 – Present) • 1 year 10 months

In this role, I worked on the MAE MY mobile app for the transfers module encompassing Overseas transfer, Tabung Haji transfer, Real-time Retail Payments Platform (RPP) and ASNB transfer. Subsequently, transitioned to the regional department, I spearheaded the revamp of regional projects MAE Cambodia & MAE Philippines as the lead of the payment and transfer frontend team. Tasked with developing transfer modules, QR pay, and Secure2U, I ensured consistency across the codebase and components created.

- Demonstrated adaptability by swiftly acquiring proficiency in React Native and internal framework (DYNAMO), driving productivity in project development.
- Worked on the development and integration of QR Pay, a widely utilized payment method, within the banking and e-wallet application.
- Managed to complete multiple projects, ensuring the successful completion of SIT, UAT, and Staging phases within the timeline, resulting in a successful production launch.
- Facilitated the deployment of iOS and Android applications to various environments, including SIT, UAT, and Staging, enabling comprehensive internal testing processes.
- Managed a team of 2 junior developers, providing mentorship in understanding codebase, development, and guiding problem-solving thought processes.
- Practice agile development methodology.

Maybank, MY — RPA Developer, Group Technology (Jan 2022 – May 2022) • 4 months

Spearheaded automation projects in downstream processes, markedly improving operational efficiency across functions, fostering streamlined processes, and contributing to overall excellence.

- Contributed to the development of a custom-made framework simplifying complex interfaces with the bank's systems, streamlining automation processes across the team.
- Gained comprehensive insights into the end-to-end RPA development processes, contributing to a holistic understanding of the organization's automation strategies.

PETRONAS, MY — SAP ABAP Developer Intern, Group Digital (Jan 2020 – Sept 2020) • 8 months

Spearheaded automation projects in downstream processes, markedly improving operational efficiency across functions, fostering streamlined processes, and contributing to overall excellence.

- Performed weekly data extractions, updating remarks of data availability to monitor created and deleted custom objects.
- Initiate the project plan for Automation of Custom Objects Extraction to enhance the efficiency of previous data extraction.
- Assisted the project team in creating new programs, enhancing existing programs and debugging the issues that occurred.
- Organizing Control on Development of Custom Object (RICEFW) Review weekly meeting for discussion between functionals, developers and vendors.

EDUCATION

Universiti Teknologi PETRONAS, 2021 — Bachelor of Information Technology (Hons) with a CGPA of 3.42

TECHNICAL PROFICIENCIES

Languages JavaScript, HTML, Java, Python, CSS, SQL
Development React Native, React, NodeJS, Next.js, Redux, Tailwind
Databases MySQL
Tech & Infra AWS, Git, GitHub
